

ACRONIS TRUE IMAGE BACKUP SOLUTION

For disaster recovery and system migration in both physical and virtual environments, Acronis® True Image Echo Server for Windows delivers greater flexibility and value for SMBs and the Remote Office / Branch Office.

Are you running an organization with mission-critical Microsoft® Windows® servers in one location and limited IT staff? How much valuable time would you lose if these servers went down? Acronis® True Image Echo™ Server for Windows provides comprehensive system protection and recovery of Windows servers and allows you to get back to business and minimize downtime.

Acronis True Image Echo Server for Windows allows you to

- Create an exact Windows server disk image, including the operating system, databases, and applications;
- Migrate your systems between any virtual and physical servers quickly and easily.

After a system crash Acronis True Image Echo Server for Windows allows you to perform an entire server restore in just minutes, not hours or days. Complete system restoration can be performed to an existing system or to a new system with different hardware, as well as to a virtual server. *

Based on exclusive Acronis Drive Snapshot technology, Acronis True Image Echo Server for Windows allows you to create backups without interrupting server operations, providing 24 x 7 x 365 availability
